Annata IDMS Certified for Microsoft Dynamics Accreditation

[REYKJAVÍK, 26 APRIL 2010] Annata announced today that its solution **Annata IDMS for Microsoft Dynamics AX 2009** has passed the Software Solution Test for Microsoft Dynamics and now has the Certified for Microsoft Dynamics® status, the same as Annata IDMS for Microsoft Dynamics AX 4.0 has had since April 2008.

Annata IDMS for Microsoft Dynamics is a solution for importers, wholesalers, dealers and service providers in the automotive and equipment industry. It is built as an add-on to Microsoft's Dynamics AX ERP software.

Certified for Microsoft Dynamics is Microsoft Corp.'s highest standard for partner-developed software. This certification represents a significant step in elevating the standard for partner-developed software solutions for industry-specific business applications. Solutions with a successful software test have demonstrated development quality and compatibility with the Microsoft Dynamics product. VeriTest, a service of Lionbridge, performed independent and rigorous testing on the solution's integration with Microsoft Dynamics. Annata has also earned the Microsoft Certified Partner designation with the ISV Competency.

“By requiring the software solution to meet our highest standards, Microsoft is assuring customers that these certified solutions work with their investments in Microsoft Dynamics,” said Doug Kennedy, vice president, Microsoft Dynamics Partners. “Microsoft congratulates Annata on the software test results and the certification”

Annata IDMS for Microsoft Dynamics AX utilizes the standard features of Microsoft Dynamics AX as well as extensive additional features specifically designed to support the automotive and equipment downstream business. The solution can be viewed as a twofold delivery: A) a set of additional forms, reports and work processes specifically made for the automotive and equipment industry and; B) a set of best practices in utilization of both standard Dynamics AX as well as the add-on processes for the automotive or equipment importer or dealer group. This includes the best practice of data setup for Microsoft Dynamics AX for the industry. The solution is built as a multi-company, multi-branch and multi-brand solution, i.e. the

importer and/or dealer can handle many different brands of vehicles and equipment and different manufacturer's requirements.

Annata IDMS is built in a way that it can handle all kinds of equipment and vehicles such as cars, boats, machines, heavy machinery, forklifts and quarrying devices to name a few.

About Microsoft Dynamics

Microsoft Dynamics is a line of financial, customer relationship and supply chain management solutions that help businesses work more effectively and efficiently. Delivered through a network of channel partners providing specialized services, these integrated, adaptable business management solutions work like and with familiar Microsoft software to streamline processes across an entire business.
